

Mission

ACEROS URSSA is a company with more than 35 years of professional experience in the special steels sector. Our main strategy is focused on offering high-quality products to our customers, relying on a highly qualified human team and a wide range of high value-added products.

Vision What do we want to be?

Our vision is to become a leading reference in the special steels sector, meeting the needs and expectations of our customers, providing them with service assurance and product quality. The Management of ACEROS URSSA formalizes its commitment to the quality of the products it supplies, respect for the Environment, and compliance with occupational risk prevention requirements, through the implementation of an Integrated Management System for Quality, Environmental Management, and Occupational Health and Safety, based on the **UNE-EN ISO 9001, 14001, and 45001** standards, which encompasses everything from customers and workers to society in general.

Values of ACEROS URS, S.A. *In what way?*

The values of the quality, environment, and occupational health and safety policy are the following:

- Adaptation to the expectations and needs of our customers and other stakeholders.
- Commitment to continuous improvement in all organizational processes.
- Transparency and collaboration with subcontractors, suppliers, customers, and the social environment.
- Analysis and management of the training, motivation, and preparation required by our personnel to guarantee the necessary competencies for each position, with the best assurance of safety and in the appropriate time and manner.
- Respect for the environment and prevention of contamination, personal injury, and deterioration of the health of all interested parties.
- Compliance with legal, environmental, health and safety requirements, those established by our customers, and those subscribed to by the organization itself.
- Implementation of the appropriate reference framework to establish and review company objectives, ensuring that the policy is documented, implemented, maintained, and communicated to all people working for or on behalf of the organization.
- Efficiency in process management and continuous improvement of the management system.
- Ensuring the safety of all employees by actively working on accident prevention, and transmitting our concern to companies working on our behalf.
- Prevention of injury and deterioration of the health of all interested parties.
- Respect for and protection of the Environment, as well as the prevention of environmental pollution that may derive from the company's activity.
